This series of learning tools was carefully developed by experts and researchers according to the primary-school teaching syllabus for nine-year compulsory education.Closely aligned with textbook content, the tools demonstrate mathematical concepts through intuitive phenomena, making learning enjoyable and suitable for students' psychological and physical characteristics. They are excellent aids for cultivating children's interest in learning, reducing students' burden, developing intelligence and improving overall quality With innovative designs, attractive shapes, simple operation and effective experimental results, this series fits children's age characteristics. It helps develop students' hands-on practical ability, enhance their learning interest and improve classroom teaching results.
